A BILL

To amend the Public Health Service Act to improve reproductive health care of individuals with disabilities.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Reproductive Health
5 Care Accessibility Act”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

1 (1) In the United States, there are approxi-
2 mately 1 in 4 adults with disabilities, 1 in 10 indi-
3 viduals with disabilities who are able to become
4 pregnant, and approximately 4,100,000 parents with
5 disabilities.

6 (2) All people, including individuals with dis-
7 abilities, have the right to decide if, when, and how
8 to start and raise a family.

9 (3) Title II and III of the Americans with Dis-
10 abilities Act of 1990 (42 U.S.C. 12131 et seq. and
11 12181 et seq.), section 504 of the Rehabilitation Act
12 of 1973 (29 U.S.C. 794), and section 1557 of the
13 Patient Protection and Affordable Care Act (42
14 U.S.C. 18116) provide individuals with disabilities
15 with the right to equitably access and receive health
16 care.

17 (4) Disabled people face unique barriers when
18 accessing reproductive health care, including accessi-
19 bility at health care facilities, lack of accessible med-
20 ical diagnostic equipment, barriers to accessible trav-
21 el, delay in receiving preventative services, and lack
22 of health care providers with training and knowledge
23 on the needs of individuals with disabilities receiving
24 reproductive health care.

1 (5) The United States Access Board has estab-
2 lished standards for accessible medical diagnostic
3 equipment, however without enforceable standards
4 adopted by the Department of Health and Human
5 Services and Department of Justice, systemic im-
6 provements in the availability of accessible medical
7 diagnostic equipment will not be achieved.

8 (6) Disabled people have an equal right to re-
9 productive autonomy, but harmful stereotypes create
10 barriers to getting care that respects that autonomy.

11 (7) Laws that restrict access to reproductive
12 health care, including abortion care,
13 disproportionally harm people who already face bar-
14 riers to reproductive health care which includes dis-
15 abled people.

16 (8) Individuals with and without disabilities
17 want children at the same frequency, but individuals
18 with disabilities experience less likelihood of receiv-
19 ing contraception counseling and timely prenatal
20 care, experience a higher rate of sterilization, and
21 are at a greater risk for adverse pregnancy out-
22 comes.

23 (9) Diversity and inclusion in the health care
24 workforce is a critical factor in the delivery of high-
25 quality, culturally competent health care and im-

1 proves patient outcomes. However, the rate of stu-
 2 dents and trainees with disabilities in medical and
 3 allied health education remains low compared to
 4 those without disabilities.

 7 (42 U.S.C. 294 et seq.) is amended by adding at the end
