A BILL

To amend the Omnibus Crime Control and Safe Streets Act of 1968 to authorize a State veterans assistance program, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Veterans Medical
5 Legal Partnerships Act of 2021”.

6 **SEC. 2. FINDINGS.**

7 Congress makes the following findings:

1 (1) Medical-Legal Partnerships (hereinafter re-
2 ferred to as MLPs) are holistic care models that in-
3 tegrate legal expertise and services into health care
4 settings or delivery systems to address underpinning
5 social and legal needs that negatively affect the
6 health outcomes of veterans and their families.

7 (2) MLPs build upon the traditional legal clinic
8 model by leveraging the unique, historical collabora-
9 tions between legal services organizations and med-
10 ical providers.

11 (3) Among other things, MLPs screen for, and
12 then aim to resolve legal issues veterans present,
13 that may include income security issues, unsafe
14 housing, impending evictions, family law matters,
15 benefit concerns, elder abuse, and guardianship
16 issues. Especially during the COVID–19 pandemic,
17 these needs were also shown to have direct implica-
18 tion on population health and the stability of our
19 economy.

20 (4) In addition to providing direct legal serv-
21 ices, MLPs help to improve quality and increase
22 value in health care delivery systems by engaging in
23 activities such as trainings for clinical teams and
24 helping health care providers optimize their services.

1 (5) MLPs have experienced steady growth and
2 reach since they were first developed in the mid-
3 1990s. In 2020 alone, some 450 MLPs in 49 States
4 helped more than 75,000 individuals resolve health-
5 harming legal needs. In recent years, MLPs have
6 flourished as effective models of care for veterans.

7 (6) Veterans are disproportionately at higher
8 risk for health problems, many of which are exacer-
9 bated by unmet social and legal needs. The percent-
10 age of veterans who have at least one disability is
11 double that of non-veterans, and 41 percent of vet-
12 erans have mental health conditions such as depres-
13 sion, traumatic brain injury, post-traumatic stress
14 disorder (PTSD), and substance use disorder.

15 (7) Veterans are also at higher risk of having
16 legal issues, with one recent study finding an aver-
17 age of 1.5 legal issues per veteran. The most com-
18 mon civil legal needs included lack of access to VA
19 benefits, custodial issues, and housing issues like
20 eviction. Unmet legal needs are particularly harmful
21 to the more than 1.7 million veterans with family in-
22 comes below 125 percent of Federal poverty level. In
23 fact, a 2017 analysis found that civil legal problems
24 related to veterans' issues affected 13 percent of
25 low-income households with veterans or other mili-

1 tary personnel. For these households, the most com-
2 mon legal problems were in the areas of health or
3 health care, consumer finance issues, and employ-
4 ment.

5 (8) MLPs have proven to be a successful model
6 of addressing issues related to veteran care. One
7 study found that Veterans who received treatment at
8 MLPs showed significant mental health improve-
9 ment and even improvements in their housing and
10 income. Additionally, MLPs have been found to de-
11 crease readmission rates, length of inpatient hospital
12 stays, and visits to the emergency room.

13 (9) In Indiana, a 2018 grant from Indiana De-
14 partment of Veterans Affairs made possible an MLP
15 between Veteran Health Indiana and Indiana Legal
16 Services, Inc. and enabled veterans to access critical
17 civil legal services they may not otherwise have re-
18 ceived.

19 (10) A study assessed 4 MLPs in Connecticut
20 and New York and found that 75 percent of vet-
21 erans reached their legal goal in the one-year study
22 period, and in the first three months, those who re-
23 ceived full legal representation showed significant re-
24 ductions in symptoms of hostility, paranoia, psy-

1 chosis, generalized anxiety disorder, and posttrau-
 2 matic stress disorder.

3 (11) In 2017, a study designed to evaluate an
 4 MLP at UMass Memorial Hospital found that pa-
 5 tients referred by healthcare workers to Legal Aid
 6 commonly had other legal problems which the attor-
 7 neys could also help them address and 86 percent of
 8 clients said they would use the program again.

9 (12) Currently, the overwhelming majority of
 10 MLPs operate in Federal veteran’s facilities. States
 11 operate hundreds of veteran’s homes, treatment fa-
 12 cilities, and support programs that do not have
 13 MLPs or access to civil legal providers.
