1 **SEC. 3. DEFINITIONS.**

2 In this Act, the following definitions apply:

- 3 (1) ADAPTATION.—The term “Adaptation”
- 4 means the capacity of natural and human systems to
- 5 adjust to climate change or its impacts in a matter

1 that will reduce damage or take advantage of any
2 beneficial aspects.

3 (2) FREELY ASSOCIATED STATES.—The term
4 “Freely Associated States” means the Republic of
5 the Marshall Islands, the Federated States of Micro-
6 nesia, and the Republic of Palau.

7 (3) INSULAR AREAS.—The term “Insular
8 Areas” means the territories and Freely Associated
9 States.

10 (4) MITIGATION.—The term “Mitigation”
11 means measures and initiatives that would limit or
12 reduce greenhouse gas emissions.

13 (5) RESILIENCE.—The term “Resilience”
14 means the capacity of natural and human systems to
15 resist, assimilate, and recover from the effects of cli-
16 mate change in an efficient and timely manner,
17 maintaining or restoring basic structures and essen-
18 tial functions.

19 (6) RENEWABLE ENERGY.—The term “renew-
20 able energy” means energy that has been derived
21 from Earth’s natural resources that are not finite or
22 exhaustible, including solar, wind, hydroelectric, geo-
23 thermal, and ocean (thermal and mechanics).

24 (7) RENEWABLE ENERGY SYSTEM.—The term
25 “renewable energy system” includes off-grid or

stand-alone systems, microgrids, nano grids, and virtual power plants systems based on renewable energy sources, including storage and other related ancillary equipment. These may also be referred to as “eligible projects”. Waste to energy are not considered as eligible projects.

(8) TERRITORIES.—The term “territories” means American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, and the Virgin Islands of the United States.

(9) TERRITORY.—The term “territory” means American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, Puerto Rico, or the Virgin Islands of the United States.

SEC. 4. FINDINGS.

Congress finds as follows:

(1) The Insular Areas are topographically and environmentally diverse and treasured by millions of individuals who call them home.

(2) The territories in the Caribbean (Puerto Rico and the Virgin Islands of the United States) and the territories in the Pacific (American Samoa, the Commonwealth of the Northern Mariana Islands, and Guam) face many of the same climate

1 change-related challenges. Freely Associated States
2 face similar climate change-related vulnerabilities.

3 (3) Insular Areas are experiencing sea level
4 rise, coastal erosion, and increasing storm impacts
5 that threaten lives, critical infrastructure, eco-
6 systems, and livelihood security.

7 (4) Temperature increases are likely to further
8 create and intensify the length of droughts, reduce
9 water supply, impact public health, and increase de-
10 mand of freshwater in Insular Areas. In addition,
11 temperature increases will drive coral reefs to extinc-
12 tion, eliminating a natural barrier against storm
13 surge, increasing destruction of infrastructure, and
14 threatening lives of the inhabitants of the islands.

15 (5) In 2017, two major storms, Hurricane Irma
16 and Hurricane Maria, impacted Puerto Rico and the
17 Virgin Islands of the United States. Hurricane
18 Maria caused thousands of deaths in Puerto Rico
19 and the Virgin Islands of the United States and sig-
20 nificant damage to their infrastructure, including
21 Puerto Rico's energy system. Hurricane Maria de-
22 stroyed millions of trees in Puerto Rico and the Vir-
23 gin Islands of the United States, which has signifi-
24 cantly increased erosion and sediment transport. As

1 a result, reservoirs have lost significant storage ca-
2 pacity and coral reefs are severely impacted.

3 (6) In 2018, Typhoon Yutu impacted the Com-
4 monwealth of the Northern Mariana Islands and
5 Guam, causing catastrophic destruction in those ter-
6 ritories.

7 **TITLE I—GENERAL PROVISIONS**
