

117TH CONGRESS
1ST SESSION

H. RES. 113

Expressing the sense of the House of Representatives that the United States should formally withdraw from the Paris Agreement.

IN THE HOUSE OF REPRESENTATIVES

FEBRUARY 11, 2021

Mr. ARRINGTON (for himself, Mr. NEWHOUSE, Mr. WEBER of Texas, Mr. ESTES, Mr. BABIN, Mr. JACKSON, Mr. STAUBER, and Mr. MANN) submitted the following resolution; which was referred to the Committee on Foreign Affairs

RESOLUTION

Expressing the sense of the House of Representatives that the United States should formally withdraw from the Paris Agreement.

Whereas President Obama unilaterally accepted the Paris Agreement in August 2016 under the United Nations Framework Convention on Climate Change, rather than ratifying it as a treaty with the advice and consent of the Senate, a requirement stated in article II, section 2 of the Constitution;

Whereas the agreement entered into force on November 4, 2016;

Whereas, on June 1, 2017, President Trump announced that the United States would cease all implementation of the Paris Agreement;

Whereas, on January 20, 2021, President Biden followed President Obama's precedent by unilaterally rejoining the Paris Agreement without congressional consent;

Whereas in addition to the United States having entered into the agreement without congressional approval, burdensome regulatory measures will put the United States at a competitive disadvantage, costing American jobs and increasing energy costs for consumers and taxpayers;

Whereas according to one report, implementing policies to comply with the Paris Agreement will increase electricity costs for a family of 4 between 13 and 20 percent annually;

Whereas a cost-benefit analysis was not conducted at the time of commitments, and subsequent reports have found that meeting the commitments agreed to could cost the United States GDP \$250,000,000,000 and 2,700,000 jobs by 2025;

Whereas all 28 European Union countries are falling short of their commitments under the Paris Agreement, and meanwhile, the world's worst emitters, China, Russia, and India, are exempted from its requirements;

Whereas according to the International Energy Agency, the United States has seen the largest absolute decline in emissions among all countries since 2000;

Whereas a recent study showed that the Paris Agreement will not have any meaningful impact on climate change, reducing global average temperatures by just 0.086°F in 2100;

Whereas the United States is pioneering environmental protection without international interference, is a world leader at reducing pollutants known to cause immediate harm to humans, and is ranked number one in the world for clean water, according to the World Health Organization's airborne particulate matter standards and the Environmental Protection Agency; and

Whereas instead of binding the United States to international agreements that put Americans at a national security and economic disadvantage to its competitors abroad, the United States should be focused on continuing to reduce emissions, developing and exporting clean energy technologies, and making its communities more resilient, all while ensuring affordable, reliable energy prices and prioritizing the consumer, American security, and prosperity: Now, therefore, be it

- 1 *Resolved*, That the United States should formally re-
- 2 submit its notification to withdraw from the Paris Agree-
- 3 ment.
