## 117TH CONGRESS 2D SESSION

## H. RES. 1122

Expressing support for designation of May 16, 2022, as the "National Day of Light".

## IN THE HOUSE OF REPRESENTATIVES

May 16, 2022

Mr. Morelle (for himself and Mr. Mast) submitted the following resolution; which was referred to the Committee on Science, Space, and Technology

## RESOLUTION

Expressing support for designation of May 16, 2022, as the "National Day of Light".

- Whereas the National Day of Light is aimed at raising awareness of the vital role of light in our daily lives and its importance to 21st-century technology and innovation;
- Whereas for centuries, light-based technologies have provided solutions to worldwide challenges in energy, agriculture, manufacturing, telecommunications, national security, and health;
- Whereas optics and photonics is the study of the fundamental properties of light and harnessing them for practical applications;

- Whereas light has revolutionized medicine through technologies such as x-ray imaging, laser surgery, and cancer treatments;
- Whereas light has transformed communication via the internet, a tool we cannot imagine living without today;
- Whereas light has helped us improve transportation safety with sensors in vehicles and advanced infrastructure monitoring;
- Whereas light has greatly enhanced the ability of the United States to gather intelligence, defend the Nation, and protect its troops in the field;
- Whereas most of what we have observed in the universe is known only through light-based technologies, first from the visible wavelengths observed by Galileo into x-ray, infrared, and radio waves, and even gravitational waves detected by lasers;
- Whereas advanced manufacturing is possible due to lightbased technologies that can provide custom, precise, and high-added value through means such as additive manufacturing;
- Whereas quantum computing, sensing, and communication systems are largely enabled by light-based technologies;
- Whereas through the National Quantum Initiative Act (Public Law 115–368), the United States is accelerating our investment in quantum information science and the development of commercially available quantum-based technologies, thereby facilitating growth in the economy of the United States and protecting our national security; and
- Whereas May 16 is already recognized internationally as the Day of Light: Now, therefore, be it

1	Resolved, That the House of Representatives—
2	(1) supports the designation of a "National
3	Day of Light";
4	(2) recognizes the continuing importance of the
5	United States as the world leader in light-based
6	science and technologies;
7	(3) recognizes the importance of inspiring the
8	next generation of scientists, researchers, innovators,
9	technicians, and entrepreneurs; and
10	(4) encourages schools, community colleges, and
11	universities to observe the day with appropriate ac-
12	tivities.
